Special thanks to **all** of our volunteers, including the **Book Sale Volunteers & Building and Grounds Crew!**

This year, our library is going solar...

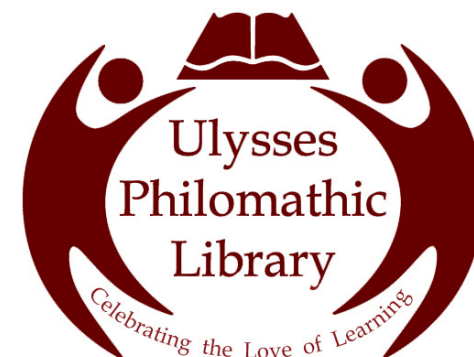

Array Size (kiloWatt)	45.78
Average Annual Production (kWh)	48,611
% of total UPL electricity use	100%
Panel manufacturer	Sun Power
Panel Product & Power warranty	25 yrs /25 yrs
Panel efficiency (Watt)	327
# of panels	140
Inverters (#), make, size	(4) Fronius Symo Lite 10.0-3 208-240
Total project cost (w/tree removal, estimated)	\$132,490
Est. NYSEDA contribution	-\$18,312
Grant \$\$	-\$55,313
Net UPL funding required	\$58,865
Approx yearly electric costs (not all NYSEGs costs replaced by solar)	\$5,400

Taitem ("Technology As If The Earth Mattered") Engineering, has designed a Solar installation that is highly desirable for our library needs. This efficient design is intended to enable 100% of UPL's electric consumption to be solar generated. This design allows for a smaller array size, fewer inverters, less impact on our trees, and has one of the best material and production guarantees possible. The library matters; the earth matters; and we are proud to be going solar.

Thank you to everyone who has made this energy saving measure a reality and our future brighter:

Finger Lakes Library System, New York State Education Department/New York State Library Construction Grant Program, Ulysses Philomathic Library Community Donors, & our 2015 Solar Committee: Kathy Bond, René Carver, Dolores Higareda, Joanna Lynch, Cynthia Mannino, Roxanne Marino, Barbara Melvin, Scott Mulford, Julia Parete, Dana Smith, John Wertis, & David Wren. A special thank you to John Ullberg for his support of this initiative.

Annual Report 2015

The Ulysses Philomathic Library is an educational and cultural resource center which strives to meet the informational, creative, and leisure needs of all community residents.

To that end, the library will provide a broad collection of materials and access to a wide network of contemporary resources & media.
